I

Many travelers fail to recognize the importance of socks on their trips, says Jane Anderson, a Chapil Hill, N.C., pediatrician for the North Car-
olina Foot & Ankle Society. "The wrong socks can lead to

bleeding, and everyday socks, usually made of cotton or a synthetic

material, is attached to its own Wigwam Rebel Fusion Crew II

sock and the health benefits of a compression sock.

Another appeal of Bombas is its "Laundry Back Guar-
antee." If one of your socks disappears into the notorious

Bermuda Triangle of laundry within a year of purchase, the

company will replace it. A pair of Bombas socks will outlast the

average pair of socks by three times, according to the

company. And if you've learned just one lec-

ture, it's this: Pack the right kind of socks to match the demands of your travels.

By Christopher Elliott

Pack the right kind of socks to match the demands of your travels.

It sounds trivial, but it's not.

"The wrong socks can lead to

bleeding, and everyday socks, usually made of cotton or a synthetic

material, is attached to its own Wigwam Rebel Fusion Crew II

sock and the health benefits of a compression sock.

Another appeal of Bombas is its "Laundry Back Guar-
antee." If one of your socks disappears into the notorious

Bermuda Triangle of laundry within a year of purchase, the

company will replace it. A pair of Bombas socks will outlast the

average pair of socks by three times, according to the

company. And if you've learned just one lec-
ture, it's this: Pack the right kind of socks to match the demands of your travels.
